

App Roadmap

Warriors Mass · A Fathered initiative

Draft for review · September 2026

Three Phases

A team of AI agents builds and tests this software in parallel.

Built So Far

- The first version of the site is built and tested: sign-up for men, the leader interest form, the leader feedback form, an admin view with CSV export, and consent to receive text messages.
- A design preview showing three visual directions for the site is live at <https://preview.warriorsmass.com>.
- The domain warriorsmass.com is owned and ready to point at the finished site.

Platform and Messaging: Decided

These decisions are final.

AREA	DECISION
Platform	A web app first (a "PWA," which installs from a browser like an app, with no app store needed). A native phone-store app comes later, only if the web app can't do what's needed.
Texts	Reminders and alerts go out through the text system already built and tested for the Fathered app, with each man's consent on file.
Carpool and leader chat	Through the Advent test, leaders and carpool groups coordinate in WhatsApp or Signal groups that they run themselves. Chat built into the app comes later.
Calendar	A calendar invite file (an ".ics" file) that opens in whatever calendar app a person already has. No new account or sign-in needed.

Money: No money moves through the app during the pilot or the Advent test. Canada's rules on money-transfer services (FINTRAC) make that too risky to build now. After Advent, once the community is established, a test of parking-pool and hospitality-donation features can run through a registered payment processor, after legal advice.

Ready Before Oct 16 (First Mass)

Everything on this list has to work before the first Mass.

FEATURE	DETAIL
Men's sign-up, with text consent	Name, phone number with consent to receive texts, work start time, and work area.
Mass listing and subscribe	Men can see a Mass and subscribe to it.
Reminder text the night before	To everyone subscribed.
Cancellation texts	To every subscriber if a priest falls through.
Priest schedule	A named backup per date, automatic reminders to each priest, and a way for a priest to request a swap or ask another priest to cover.
Leader outreach tracking	Each leader's invite list, invite status, and follow-up reminders, plus a dashboard for organizers.
Attendance check-in	By QR code at the church door.
Calendar invites	.ics files for priests and for subscribed men.
Leader interest and feedback forms	Already built and live.

Advent, From Dec 1

FEATURE	DETAIL
Test carpool matching	Men can offer or ask for a ride from the church to a work area.
Group chat stays in WhatsApp or Signal through Advent	No in-app chat yet.

After Advent, Early 2027, Once the Community Is Established

FEATURE	DETAIL
Test money features	A parking pool and hospitality donations, run through a registered payment processor, after legal advice.
In-app group chat	Replacing WhatsApp and Signal.
City search with "start one here"	When a man searches a city with no Mass yet, he can start one.
Multi-parish scheduling	Once more than one parish is running Masses regularly.

AI Assistance

Two jobs: prompting a leader when a man on his list goes quiet, and confirming a priest's availability ahead of a date. Both start simple, as automated reminders, before Oct 16. They can grow more capable later, once there's real usage to learn from.

Later (Not Sequenced)

Native app, full daily-rotation planner across parishes, fellowship-and-study scheduling, parish self-service onboarding. The Warriors Mass Vision document names these as work for after this first version. This roadmap doesn't size them.
